SUMMARY

Java Backend Developer with hands-on experience in **Java, Spring Boot, REST APIs, and microservices**. Experienced in developing scalable backend solutions, database-driven applications, and integrating frontend and backend systems. Strong foundation in **software development, API design, and database management**, with experience working in Agile/Scrum teams.

SKILLS

Languages: Java, JavaScript, C
Backend: Spring Boot, Spring MVC, REST APIs, Microservices
Frontend: React.js, Redux, HTML, CSS, Tailwind CSS
Databases: PostgreSQL, SQL
Testing & API Tools: Postman
DevOps & Development Tools: Git, Maven, Docker, IntelliJ IDEA
Cloud: AWS

EXPERIENCE

Java Developer Intern **June 2026 – Present**
Beagle Security, Technopark, Thiruvananthapuram

- Developed and integrated **Spring Boot REST APIs** for application management, bulk imports, search, filtering, pagination, and dashboard workflows within a **microservice architecture**.
- Engineered a **dynamic PDF report generation pipeline** using **Playwright and Handlebars (HBS)**, transforming database data through DTOs into HTML-based assessment reports and generating production-ready PDFs.
- Designed and implemented **PostgreSQL database schemas and staging tables** to support bulk application imports, including data validation, duplicate detection, error handling, and import-status tracking.
- Built **streaming and progress APIs** to provide real-time status updates for long-running bulk import operations and support dashboard progress visualization.
- Developed backend functionality for **application and project listing**, including server-side search, filtering, pagination, and configurable query parameters.
- Worked across a **Java/Spring Boot microservices stack** using **JPA, PostgreSQL, RabbitMQ, Maven, Docker, Git, Postman, and AWS** for development, integration, testing, and debugging.
- Collaborated within an **Agile/Scrum development environment**, participating in sprint planning, daily stand-ups, code reviews, technical discussions, debugging, and feature delivery.
- Authored and maintained **API specifications and technical documentation**, keeping newly developed endpoints and workflows aligned with backend implementation.

Full Stack Developer Intern **May 2025 – Feb 2026**
Bridgeon, Kakkancheri

- Developed backend services using **Java and Spring Boot**, building RESTful APIs for application business logic and data processing.
- Integrated **React.js frontend applications with backend REST APIs**, implementing end-to-end data flow between client and server components.
- Designed and optimized **SQL queries and database operations** to improve data retrieval and application performance.
- Applied **MVC architecture and backend development best practices** to improve code organization, maintainability, and scalability.
- Used **Git** for version control and collaborative development, managing feature branches and source-code changes.

PROJECTS

E-Commerce React Frontend Application

- Developed a responsive e-commerce web application using **React.js and Tailwind CSS** with a modern user interface.
- Implemented state management using **Context API** for cart, wishlist, and user authentication features.
- Built and integrated a mock RESTful backend using **JSON Server** to manage products and user data.
- Designed and consumed REST APIs supporting CRUD operations.

- Implemented dynamic product detail pages and routing using **React Router**.
- Developed core features including add-to-cart, wishlist management, and checkout workflows.
- **Live Project:** car-beryl-three.vercel.app

Anime Store Web Application

- Developed a full-stack e-commerce application using **React.js and Spring Boot**, supporting product management, user authentication, cart, order, and payment workflows.
- Built a **RESTful API layer** with controllers for Products, Cart, Orders, Authentication, and Payments using MVC architecture.
- Integrated the **Razorpay Payment Gateway** for real-time order creation and payment processing using the Razorpay Java SDK.
- Implemented paginated product listing and keyword search using **Spring Data JPA and PageRequest** for efficient handling of large datasets.
- Designed a normalized **PostgreSQL database schema** with entities for Users, Products, Cart Items, Orders, Order Items, and Addresses.
- Applied the **DTO pattern** to decouple API request/response contracts from internal entity models.
- Configured **CORS and Spring Security** to support secure cross-origin communication between the React frontend and Spring Boot backend.
- Containerized the backend using **Docker** for consistent deployment environments.
- **Live Project:** anime-premium.vercel.app

CERTIFICATIONS

- Java (Basic) Certification – HackerRank — Apr 2026
- Databases for Developers: Foundations – Oracle Dev Gym — Apr 2026
- Embedded C and AVR – Verdant IT Solutions — Feb 2024

LEADERSHIP EXPERIENCE

Social Media Head

College Arts Festival

- Managed social media campaigns and coordinated promotional activities to improve event visibility and audience engagement.

Publicity Head

Astronomy & Space Research Committee (AISA)

- Led publicity initiatives and managed communication and outreach activities for technical events and programs.

EDUCATION

Bachelor of Technology in Electronics and Communication Engineering

Mar Athanasius College of Engineering, Kothamangalam
2021 – 2025
